

RISER CART

ABSTRACT

A riser cart including a cart support frame, a first swing arm post assembly
5 and a second swing arm post assembly. The cart support frame has a plurality of wheels
rotatably attached thereto. The first swing arm post assembly is mounted to the cart
support frame. The first swing arm post assembly includes a first swing arm post and a
first plurality of swing arms. The first swing arms are rotatable between a storage
position and a loading position. The second swing arm post assembly is mounted to the
10 cart support frame. The second swing arm post assembly includes a second swing arm
post and a second plurality of swing arms. The second swing arms are rotatable between
a storage position and a loading position.
